

PillSync AI Platform · Admin Data Source Audit & Reality Matrix

UI Metric / Card	Displayed Value	Real-Time Live?	Actual Data Source in Code
Active Patients	7 Patients	100% REAL LIVE	Live DB query on users table (role='patient')
Total Caregivers	2 Caregivers	100% REAL LIVE	Live DB query on users table (role='caregiver')
Prescriptions Tracked	5 Medicines	100% REAL LIVE	Live DB query on medicines table
User Management Roster	All 11 Users	100% REAL LIVE	Live fetch with search & pagination (/api/v1/users)
Audit PDF / CSV Export	Binary PDF/CSV	100% REAL LIVE	ReportLab engine on live database records
API Ping Response Time	0.81 ms	100% REAL LIVE	FastAPI X-Process-Time HTTP Header
PostgreSQL / FastAPI Card	4ms / 24ms	Semi-Live	Connectivity verified live; RPS is baseline load estimate
Redis Queue / Cache	1ms, 8.4k keys	Semi-Live	Ping is live; key counter is baseline simulation
CPU & Memory (RAM %)	42% CPU, 61% RAM	Simulated Mock	Browser security restricts raw OS chip reading
Twilio / SMS Gateway	98.7% delivery	Simulated Mock	Baseline demo state (saves live Twilio per-SMS fees)
Incident History Log	7 Incidents	Simulated Mock	Prevents blank white table on fresh zero-error system

■ 3-Step Live Proof Demo for Mentors

- 1. Live Counter Proof:** Open incognito window (/register) and create a user. Refresh Admin dashboard — Active Patients count jumps by +1 immediately.
- 2. Sub-Millisecond Latency Proof:** Open F12 Network Tab, click 'Test API Ping', and show the X-Process-Time: 0.81ms response header from FastAPI.
- 3. Live PDF Stream Proof:** Click 'Audit PDF' to download the document. Show that it prints the admin's exact email, current minute timestamp, and real database roster.
